

Robot

September

We tried different bases and wheels for the drivers preference

October

Played around with the old robot

November

Kick off happened

We started on designs and ideas for the robot and got some parts for it

December

We started building prototypes and structures

January

prototypes were finished and good copies were being built.

February

Loading mechanism is now finished and on the robot. Circuit is connected. Shooting mechanism is almost done.

Kiosk

December

- After rebuilding of kiosk we started sketch and did half before the break
- Planned the colours

January

- Finished sketch
- Couldn't start painting right away-didn't have paint
- Painted pink land and base of sky

February

- We painted mountains and lakes made out of chocolate and added detail to them
